

Sebastian Guevara

Full Stack Developer

Argentina | jseb.guevara@gmail.com | +54 379-4619729 | Portfolio: sebguevara.site | LinkedIn: [sebguevara](https://www.linkedin.com/in/sebguevara)

Summary

Full Stack Developer with 5+ years of experience building production web applications, APIs, and backend services. Core stack: Next.js, React, Node.js, Express.js, TypeScript, PostgreSQL, and Redis. Experienced with REST/GraphQL APIs, external integrations, asynchronous processing, data ingestion, testing, and deployments with Linux, Docker, and cloud platforms. I work autonomously end to end and use Claude Code, Codex, and MCPs to accelerate development, documentation, debugging, and testing while validating results.

Experience

Municipalidad de Corrientes

Team Lead - Full Stack Developer | Feb 2024 - Present | Corrientes, Argentina

- Designed and maintained services and APIs for high-availability municipal systems using Express, PostgreSQL, Redis, Next.js, and React Native.
- Automated the license renewal process, reducing operational workload by 70%.
- Led prioritization, code reviews, and production deployments while coordinating team execution.

Dinatech

Full Stack Developer | Oct 2022 - Dec 2023 | Remote

- Implemented API features and integrations with React, PHP, Redis, and PostgreSQL across production web applications.
- Maintained and improved web applications within agile, remote teams.
- Refactored an agricultural platform, improving load times by up to 60%.

Yugoo

Backend Developer | Aug 2021 - Oct 2022 | Remote

- Developed backend features and services with .NET, C#, and SQL Server, focusing on performance and scalability.
- Contributed to service integrations and API evolution for web products with an Angular frontend.

Projects

Quadro - usequadro.com

Co-founder and Full Stack Developer | May 2026 - Present

- Multi-tenant SaaS for padel tournament management built with Next.js, Express.js, PostgreSQL, Redis, and Python modules: online registration, payment flows, fixture generation, CRM, and WhatsApp notifications.
- Owned backend, frontend, UX, and infrastructure on a self-managed VPS, taking the product from decisions to end-to-end delivery.

Minuto 90 Score - minuto90score.com

Co-founder and Full Stack Developer | Oct 2025 - Present

- Real-time sports results platform with ingestion, normalization, and persistence of external provider feeds, asynchronous processing, and high-traffic public pages.

CONICET - Soil moisture project in the Litoral region

Full Stack Developer | Aug 2024 - Nov 2025

- Analyzed and processed SMAP/SMOS satellite data on soil moisture, drought, and precipitation, and developed the results web platform with Python, H5/HDF5, SQL Server, Protobuf, and Vue.

Technical Skills

Backend and integrations: Node.js, Express.js, NestJS, RESTful APIs, GraphQL, Python, .NET, C#, Bun, Elysia, external API consumption, Protobuf

Data and processes: PostgreSQL, SQL Server, MongoDB, Redis, BullMQ, H5/HDF5, Prisma, data ingestion, normalization, asynchronous processing

Frontend: React, Next.js, TypeScript, Svelte/SvelteKit, Vue, Angular, React Native

Infrastructure and delivery: Linux, Docker, self-managed VPS deployments, AWS, Google Cloud Platform, Git/GitHub, GitHub Actions, agile methodologies

Testing and quality: unit testing, integration testing, end-to-end testing (E2E), Playwright, test automation

AI and tooling: Claude Code, Codex, MCP, LangChain, LangGraph, language model APIs, RAG, vector databases, prompt engineering

Education

- Information Systems Bachelor's Degree | National University of the Northeast | 2021 - Present (thesis submission pending)
- University Programmer Analyst | National University of the Northeast | 2023

Languages

Spanish: Native | English: B2
